Summary

Results-driven SDET / QA Automation Engineer with 1 year of experience in UI, API, and mobile automation for enterprise clients. Skilled in TypeScript, WebDriverIO, Cucumber (BDD), Postman, and Appium, with exposure to Playwright, React, and Next.js. Experienced in Agile, CI/CD, and cross-browser/device testing, with a strong focus on building scalable and maintainable test frameworks.

Education

Dr. A.P.J. Abdul Kalam Technical University

2021-2025

- BTech in Computer Science & Engineering

74%

Experience & Internships

Full Stack Developer Intern – Yhills Ltd., Noida

6 Months (2024)

LinkedIn-like professional networking platform)

- UI components using React, Redux, and JavaScript — including user profiles, job listings, and recruiter dashboards.
- REST APIs with the backend, implemented bug fixes, and contributed to performance improvements across core platform features.
- Python and full-stack development workflows in an Agile team environment.

Software Engineer (QA Automation Engineer/SDET) – FIRMINIQ SYSTEMS Pvt. Ltd.

Client: Chamberlain Group, USA — myQ Mobile App Migration (IoT/Smart Home Product)

May 2025 – Present

- WebDriverIO + Cucumber (BDD) — covering UI, API, and regression test suites for a US client's mobile app migration project.
- BDD feature files and reusable step definitions using OOP & Page Object Model (POM), reducing test duplication and improving framework maintainability.
- cross-browser and cross-device testing via LambdaTest and mobile automation with Appium, ensuring product quality across 10+ device/browser combinations.
- API testing with Postman to validate backend services and ensure reliability of RESTful endpoints.
- CI/CD pipelines to enable continuous testing and early defect detection across release cycles.
- defect tracking and test execution using JIRA & QMetry in an Agile/Scrum environment — collaborating with developers and PMs on sprint deliverables.
- E2E and regression testing pre-release, contributing to zero critical production defects during the migration phase.

Project

Duolingo Clone – Language Learning App - live link 📄

📄 Repo Link ⇄ Tech Stack: Next.js, React.js, TypeScript, PostgreSQL, Drizzle

- Built a gamified language-learning system with Next.js, React.js, PostgreSQL, and Drizzle, providing tailored learning paths and real-time tracking.
- Implemented safe payment processing and subscription management for hassle-free transactions and user access control.
- Combined interactive audio-visual content, leaderboards, and rewards for user engagement and retention.
- Tuned backend performance with PostgreSQL and Drizzle to provide efficient data handling and scalability.

Technical Skills

- Automation Frameworks: WebDriverIO, Cucumber (BDD), Playwright, Appium, Page Object Model (POM)
- Languages: TypeScript, JavaScript, C++, SQL
- Testing Types: UI Automation, API Testing, Mobile Automation, Regression, E2E, Functional, Manual, BVA & Equivalence Partitioning
- API & Tools: Postman, REST API Testing, Appium Inspector
- CI/CD & DevOps: GitHub Actions, CI/CD Pipelines, Git, GitHub (Branching & PRs), LambdaTest
- Bug & Test Management: JIRA, QMetry, Test Case Design, Defect Lifecycle
- Frontend / Backend: React, Redux, Next.js, Node.js (Basics), MongoDB (Basics)
- Concepts: OOP, Agile/Scrum, SDLC/STLC, Test Framework Design, BDD Feature Creation

Awards and Achievement

🏆 Solved 150+ DSA problems on Leetcode, securing 16+ badges.

🏆 Achieved Top 18K Global Rank among 500K+ users on Leetcode(Top 15%).

🏆 State-Level Chess Representative & AKTU Zonal Winner (2021–2025), with 4 Gold and 1 Silver medal.

🏆 State-Level Scout & Guide Representative (2012-2019).
